Empowerment that builds the present and future

About Us

Tamdeen Youth Foundation (**TYF**) is a Yemeni non-governmental organisation that focuses its work in the areas of: Humanitarian Response and Aid, Local Development, Climate Action, Peacebuilding, Youth and Women Empowerment, and Good Governance. **TYF** started as a volunteer initiative and became a legally registered organisation in 2013.

TYF has been granted consultative status by the United Nations Economic and Social Council (**ECOSOC**).

Vision

A dignified society in which every individual enjoys a sense of well-being and sustainable development.

The mission

To respond promptly and create creative mechanisms for growth, sustainability and the creation of a positive impact on the environment.

Our values

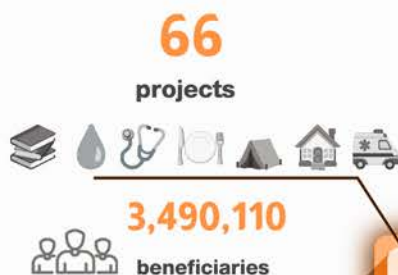

Excellence Impartiality.....Transparency
Participation.....Innovation.....Resilience
Inclusiveness Passion

What makes us different?

Governance

Tamdeen Youth Foundation was established in accordance with the provisions of the Yemeni Law on Associations and NGOs No. 1 of 2001 and its Executive Regulation No. 129 of 2004.

Policies

Our partners

Memberships

Achievements of Tamdeen Youth Foundation in 2024

Shelter and Protection

- Providing shelter materials for 1450 families.
- Psychosocial support for 675 people.
- Establishing and training 4 protection committees.

Food Security

- Providing food for 89,945 families.
- Improving livelihoods for 1460 families.

Health

- Basic health services for 81,183 individuals.
- Preventive nutrition for 27,206 children and women.
- Rehabilitation of 3 centers and 5 health units.
- Establishing a dialysis center and a maternity emergency unit.

Education

- Rehabilitation and restoration of 15 schools.
- Building 9 new classrooms.
- Empowering 12,259 children to receive quality education.

Water

- Providing clean drinking water from sustainable sources for 133,738 individuals.

Infrastructure

- Rehabilitation of 6 community assets.
- Paving of 5 vital roads.
- Facilitating access to services for 507,000 people.

Youth and Women Empowerment

- Rehabilitation of 3 vocational institutes and training centers, benefiting 4,420 youth annually.
- Vocational training for 551 youth.
- Supporting the establishment of private projects for 240 youth.
- Empowering 100 women to establish small economic projects.

Environment and Climate

- Solar-powered pumping systems for 2 water projects benefiting 16,000 individuals.
- Building 258 rainwater harvesting tanks providing 10,400 cubic meters of clean water annually.

Peacebuilding and Social Cohesion

- Establishing a youth network and a women's network to promote a culture of dialogue and negotiations for development.

Localization

- Establishing a digital platform to advocate for the localization of humanitarian work in Yemen.

2024

Multi-sectoral humanitarian response

Tamdeen Youth Foundation's work in 2024 was characterised by providing comprehensive and integrated assistance to groups and communities affected by the crisis, by providing basic needs, supporting livelihoods and rehabilitating infrastructure, ensuring resilience and recovery.

Shelter and non-food items support project for IDPs and the host community

Funded by

United Nations High Commissioner for Refugees (**UNHCR**)

Implementing partner

Tamdeen Youth Foundation (**TYF**)

Project activities

Distribution of livestock and motor-bikes: To improve income and create sustainable livelihoods for 16 displaced families in Ibb governorate

Delivery of shelter materials: For 1450 families affected by heavy rains and flash floods

General Food Distribution Project (GFD)

Project Summary:

The project aims to meet the basic food needs of the most vulnerable and crisis-affected families in the targeted areas by providing the necessary food assistance to enhance food security and alleviate the suffering of the population.

Geographical Scope

World Food Programme
WFP

Taiz Governorate

- Districts: Al-Misrakh, Jabal Habashi, Al-Mawasit, and Al-Ta'iziyah.
- Ibb Governorate:
- Districts: Al-Mukhadar, Yarim, Al-Nadera, and Jiblah.

Total Beneficiaries:

89,945 families

Multi-sectoral Response Project (Education, Food Security, Agriculture, Health and Nutrition) in Maqbana District, Taiz Governorate

Funded by

Yemen Humanitarian Fund (YHF)

Implementing partner:

مؤسسة تمدين شباب (TYF)

Project period

From 1 September 2023 to September 2024

Geographical scope of the project

Maqbana District, Taiz Governorate

Total project beneficiaries

54,880 beneficiaries

Components of the project

Education

- Construction of classrooms and rehabilitation of 27 classrooms in 9 schools with providing water and sanitation facilities services
- Provision of school seats, furniture, school supplies and recreational kits
- Distributing 1,376 school bags (boys and girls)
- Organising psychological support sessions and hygiene awareness campaigns
- Promoting awareness of the rights and protection of vulnerable groups

Food Security and Agriculture

- Creating employment opportunities through cash-for-work program
- Rehabilitating four community assets

Health and Nutrition

- Support 4 units and 2 health care centres for service delivery
- Provided preventive and therapeutic nutrition services to 24,598 under-five children and pregnant and lactating women

Results

- Ensuring access to inclusive and safe education for 5,489 children
- Rehabilitate 4 community assets and strengthen the resilience of 400 households
- Providing healthcare services to 39,200 individuals
- Rehabilitate 6 facilities to sustainably deliver healthcare services
- Promote local development, improving people's health and livelihoods

‘Integrated Life-Saving Interventions in Health and Nutrition’ project

Funded by

Yemen Humanitarian Fund (YHF)

Implementing partner:

Tamdeen Youth Foundation (TYF)

Implementation period:

From 1 January 2024 to 31 December 2024

Project budget:

1,199,977.04 USD

Total number of beneficiaries:

43,930 individuals

Project interventions:

- Establishment of a comprehensive obstetric emergency department at Rehab Hospital in Al Qafar district .
- Provision of healthcare services in three health facilities (Rehab Hospital, Bani Mahdi Centre, and Irian Unit).

Project results:

- Provision of healthcare services to 41,983 individuals.
- Providing preventive and therapeutic nutrition services to 1,948 children and 660 women.
- Reduce maternal and child mortality.
- Improving the quality of health services delivery provided for newborns and pregnant women.
- Providing a safe environment for childbirth
- Raising awareness about maternal and child health

Multi-sectoral rapid Impact Project in 'Food Security, Protection, Water and Sanitation'

Funded by

Yemen Humanitarian Fund (YHF)

Implementing partner:

Tamdeen Youth Foundation (TYF)

Implementation period:

1 September 2023 to 31 August 2024

Geographical scope of the project

Al Qubaita District, Lahj Governorate

Total number of beneficiaries:

31.370 beneficiaries

Objective

To improve the health and well-being of the population by providing access to clean water and sanitation, improving livelihoods, and providing protection to vulnerable households.

Project findings:

Water and sanitation:

- Construction of 258 rainwater harvesting tanks
- Improved sanitation facilities for 1,050 individuals

Livelihood support

- Establishment of small private enterprises for 50 young men and women
- Provision of basic agricultural kits and seeds (wheat, millet, daggerreotypes) to 300 families
- Distribution of 600 goats with concentrated fodder and salt cubes to 150 families

Protection and psychosocial support services

- Providing protection and psychosocial support services and cash assistance to 675 beneficiaries.
- Distribution of cash for protection to 200 households

Economic and Social Development Sector

Tamdeen Youth Foundation's Socio-Economic Development Sector aims to enhance the resilience of local communities through the implementation of innovative and inclusive development projects.

These efforts focus on infrastructure development, education opportunities, clean water sources, and sustainable economic growth, ensuring sustainable impact and local development.

23 projects to support sustainable recovery and local development in Yemen

Donor

European Union (EU)

Implementation

Tamdeen Youth Foundation (TYF) with the partnership of the United Nations Development Programme (UNDP)

Duration

January - December 2024

Geographical scope of the project

14 projects in Ibb governorate
9 projects in Taiz Governorate
Number of districts: 8 districts

Total beneficiaries

3,521,364

Ibb governorate

Districts

Al Dhahar 
Al Mishnah   
Jabla   
Yarim     
Dhi al-Safal  

Taiz Governorate

Districts

Mawiya     
Maqbana   
At Ta'iziyah     

Implemented projects:

Ibb Governorate:

1

Construction of a concrete water tank with a capacity of 1000 m³, installation of a liquefaction line and a distribution network with a length of 3,500 metres in Al-Dhahar district

This project has received great attention from the local authority and has been prioritised to reduce the water crisis in Ibb, which is the third governorate in Yemen in terms of population and the third in terms of the need for water services.

Provides drinking water to 32,510 people

2

**Paving a stone road in Jabla district
that connects 4 isolated areas in
Jabla district**

It facilitated mobility, access to vital markets and public services in the area such as hospitals and schools, created job opportunities, and contributed to supporting local development.

Total Beneficiaries
83,000 people

3

Building a fence to protect the groundwater feeding caravan, in Al-Mashnah District

The fence extends for about 420 metres in length and 1.5 metres in height, enhancing the role of the caravan in maximizing the use of rainwater and reserving about 100,000 cubic metres of water annually to recharge the underground reservoir of the governorate.

Total Beneficiaries
2,00,000 people

4

Drilling a water well in Anamer down in Al-Mashna district.

This project provided a safe source of water and contributed to improving public health and reducing diseases related to contaminated water.

Total Beneficiaries

36,122 people

5 Rehabilitation of Hadqat Canal, in Dhi Al Safal District

It was suffering from damage and cracks in its walls, hindering the drainage of rain-water, threatening the collapse of the walls, and posing an obstacle to the mobility of residents in the area.

Total Beneficiaries

102,000 people

6

Rehabilitation of the Al-Khair Educational Complex in the Hadhran area of Al-Ta'ziyah district.

6 new classrooms were built with their annexes, to accommodate the increasing number of students, improve infrastructure, reduce the gender gap in education, and take into account services for people with special needs.

Beneficiaries
2,700 students

7

Construction of 9 classrooms with annexes at Al-Nahda School in Mawiya district

This project provided a sustainable solution to the acute shortage of classrooms that forced parents to educate their children in private buildings adjacent to the school as a temporary solution.

It also strengthened the capacity of local authorities to fulfill their obligations to provide education to children School-age boys and girls.

Beneficiaries
700 students

8

Establishment of the Dialysis Centre at Yarim public Hospital in Yarim District

This centre represents a quantum leap in healthcare, opening a window of hope for kidney failure patients in Ibb and neighbouring governorates who struggle to receive regular dialysis sessions.

The centre is equipped with 5 dialysis units and a water treatment plant, allowing it to receive up to 208 patients per month, in addition to providing medical consultation services for kidney failure patients.

Beneficiaries
500,000 people

9

Concrete paving of the street linking Al-Zabiya - Al-Aslaf - Main Street, Jiblah district.

This road was a major obstacle of the movement of people and access to essential goods and services. Thanks to this project, life and recovery returned to the centre of the directorate, linking the western districts with the centre, facilitating access to services and public facilities, and contributing to the activation of the economic movement in the area.

Beneficiaries
185,742 people

10

Rehabilitation of pumping lines for the Waraf Water Project, Jabla District.

A 4-inch diameter pipe was installed from the well source in Al Sibel Ib to the water tank in the district with a length of 2,400 metres, facilitating the transfer of clean water and providing a sustainable and safe source for the local population.

Beneficiaries
27,000 people

11

**Concrete paving of the street linking 22 May
and Akmat Issa in Al Mashneh district**

With a length of 607 metres and an area of 4207 square metres, in addition to the rehabilitation of the sewage network, the project solved the issue of traffic congestion, facilitated access to public services and facilities, stimulated economic movement in the area, improved community health and preserved the environment

Beneficiaries
80,000 inhabitants

12

Restoration and rehabilitation of the Industrial Technical Institute in Yarim district

The work included equipping the institute:

- Restoration and rehabilitation of the building, classrooms and its annexes.
- Providing 500 school seats and furniture for administrative offices.
- Providing computers (49 devices) with their accessories to the computer lab, graphics and decoration, in addition to 6 desktops.
- Printers, photocopiers, digital cameras, interactive displays, and sound systems.
- 15 sewing machines and 4 modern electric embroidery machines with related tools.
- Supporting mechanical, electrical and carpentry workshops with modern equipment and tools.
- Installing a solar energy system and maintaining water harvesting tanks to meet the needs of the institute.

Beneficiaries
1,200 young men and women annually

13

Rehabilitation of the public street in the city of Al-Qaeda, Dhi Al-Safal District

This vital street is a main artery linking Taiz and Ibb governorates, and was suffering from deteriorating asphalt and sewage overflows.

This project contributed to improving infrastructure, facilitating traffic, promoting economic and commercial activity, and addressing a chronic issue that was threatening the lives of the city's residents.

Beneficiaries

54,000 residents

14

Rehabilitation and furnishing of the Commercial Technical Institute, Al Dhahar District

The rehabilitation process included renovating the entire infrastructure, including classrooms and administrative facilities, and improving the water and sewage network.

In addition, the institute was provided with an advanced space measuring device, 20 modern computers for the computer lab, and the midwifery and nursing lab was equipped with all the necessary models and devices.

The institute also received 194 study and office chairs, six L-shaped desks, three printers, three projectors, and three 92-inch interactive screens to support educational activities.

Beneficiaries
900 young men and
women annually

Implemented projects:

Taiz Governorate:

1

Development of the automotive maintenance workshop at the Industrial Technical Institute in Al-Hoban, Taiziyah District

The workshop was provided with the latest educational equipment covering various aspects of automotive maintenance, including testing devices for petrol and diesel engines, brake, suspension and power steering systems in cars, and devices for checking fuel injection and exhaust gas systems, as well as advanced diagnostic equipment and computers equipped with modern maintenance software, in addition to providing training materials, user manuals and technical documents to support continuous learning, in addition, the Survey and Planning Department was provided with the latest Total Station surveying device for the department's needs.

Beneficiaries
2,000 beneficiaries

2

Rehabilitation of 22 May School in Israr isolation in Mawiya district

The project included the renovation of 3 classrooms, with teachers' accommodation, administration and storage, the completion of the construction of 3 other classrooms, and the provision of all the basic needs of the school: Seats and furniture, water harvesting tank, toilets, and solar energy.

Beneficiaries
500 students

3

Rehabilitation of Qutaiba School in Amama isolation in Mawiya district

The works included renovating 6 classrooms, providing them with chairs, rehabilitation of three bathrooms, allocating a separate bathroom for people with special needs, building a rainwater harvesting tank, beautifying the school yard with trees, providing it with a solar energy system and building a temporary classroom

Beneficiaries
600 students

4

Supply and installation of a solar pumping system for the Al-Akhlood water project in Maqbana district

The project included levelling the site, building bases and structures on solid ground, installing a solar power system with a total capacity of 55 kilowatts, and installing a protective fence for the system.

The solar energy system produces 174 cubic metres of water per day, replacing the old pumping generators that were powered by expensive and environmentally harmful diesel fuel.

Beneficiaries
5,600 beneficiaries

5

Supply and installation of a solar pumping system for the Mashawz water project in Maqbana district

The diesel engine was replaced with a 55 kW integrated solar energy system, a retaining wall was built to protect the system from the risk of flood, and the community committee was trained to operate and maintain the system and manage the project.

Beneficiaries
5,700 beneficiaries

6

Rehabilitation of the Al-Khair Educational Complex in the Hadhran area of Al-Ta'ziyah district.

6 new classrooms were built with their annexes, to accommodate the increasing number of students, improve infrastructure, reduce the gender gap in education, and take into account services for people with special needs.

Beneficiaries
2,700 students

7

Construction of 9 classrooms with annexes at Al-Nahda School in Mawiya district

This project provided a sustainable solution to the acute shortage of classrooms that forced parents to educate their children in private buildings adjacent to the school as a temporary solution.

It also strengthened the capacity of local authorities to fulfill their obligations to provide education to children School-age boys and girls.

Beneficiaries
700 students

8

Restoration of Martyr Mohammed Hamra School in Hajda, Maqbona District

This school was prioritised by the local authorities, as it was one of the most prominent schools in the area, receiving more than 1,000 students annually. However, the conflict affected its structure and led to its deterioration, which negatively impacted education in the area.

With the success of the restoration, the school was revived and rehabilitated to provide a safe and stimulating learning environment for students

Beneficiaries
770 students

9

Rehabilitating and furnishing the Women's Development Centre in Al-Ta'ziyah district

The rehabilitation process included providing the centre with 34 sewing machines, in addition to full office furniture, providing a suitable learning environment to develop their skills and increase their employment opportunities. It enables the centre to promote women's positive participation in income-generating activities and develop the local economy.

Beneficiaries
320 beneficiaries

'Empowering women in fisheries and sustainable livelihoods through professional excellence and market integration in Aden'

Funded by

(Expertise France)

Implementing partner

Tamdeen Youth Foundation (TYF)

Project period

1 March to 31 August 2024

Geographical scope

Faqm and Ras Amran in Al Burayqah district, Aden

Project targets

50 women from the most vulnerable groups in the fishermen's communities in Al Burayqah district.

Components of the project

- Intensive theoretical and practical training on tuna and salted fish production techniques.
- Training on the skills of establishing their own businesses and entrepreneurship.
- Providing them with tools to set up their small businesses.
- Providing guidance and counselling to develop their small businesses and integration into the local market

Project findings

- Providing beneficiary women with skills in preparing fish products.
- Contribute to improving the livelihoods of women in coastal communities.
- Enhance the resilience of the fisheries sector and re-vitalise the value chain.

Provide Technical Trainings courses and toolkits for 50 Women HHs in Hodeida Yemen - Al-Kawkhah District

Funded by

United Nations Mission in Support of the Hodeidah Agreement (**UNMHA**)

Implementing partner

Tamdeen Youth Foundation (**TYF**)

Beneficiaries

50 poor and low-income women

Project objective

Enhancing economic growth for women in the Al-Khawkhah region through capacity building and market access.

Project Outcomes

- Enabling participating women to start income-generating businesses.
- Equipping participants with the necessary technical skills to enter the labor market.
- Building the capacities of 50 women in professional fields according to their preferences and market research.
- Supporting 50 women with production equipment to establish their own projects.
- Increasing women's participation in economic activities.

Project Results

- The ability of women participating in the project to start income-generating projects
- Participants acquire the technical skills necessary to enter the labor market
- Building the capacity of 50 women in professional fields according to beneficiary preferences and market study
- Supporting 50 women with production equipment to establish their own projects
- Increasing women's participation in economic activities

Building Resilience for Internally Displaced Families, Host Communities and Local Institutions Affected by Conflict

Funded by

German Federal Ministry for Economic Cooperation and Development (**BMZ**)

Implementing partner

Tamdeen Youth Foundation (**TYF**)

Targeted areas

Al Shamaytin and Al Muqatra districts - Taiz Governorate

1,882 men

1,254 women

Total: 3,136 beneficiaries

Project activities:

- Training in establishing and managing small enterprises and livelihood skills for 140 beneficiaries
- Training in livestock and beekeeping and smart agriculture for 87 beneficiaries
- Vocational training in the field of installation, operation and maintenance of solar energy systems for 30 beneficiaries
- Four rounds distribution of Cash assistance (cash for work) for 200 beneficiaries
- Providing financial grants to 140 beneficiaries to establish their own small businesses
- Providing professional kits and tools to 54 young people to start working in the installation and maintenance of solar energy systems
- Distribution of solar panels to 60 displaced and vulnerable families
- Supporting the implementation of research studies in the field of water and solid waste recycling in collaboration with Taiz University students

Improving livelihoods and resilience for the most vulnerable IDPs and host communities (especially women and youth)

Funded by

Novo Nordisk Foundation

Implementing partner

Tamdeen Youth Foundation (**TYF**)

Targeted areas

Al Shamaytin and Al Maafer districts in Taiz Governorate

Number of beneficiaries

2,299 beneficiaries

Overall Project Objective

To provide displaced people and host communities most affected by conflict with the necessary support to secure livelihoods, strengthen resilience and improve socio-economic conditions..

Main activities of the project

- Establishing and operating sustainable home farms to improve food security for beneficiary families.
- Implementation of vocational training programmes including sewing, incense making, handicrafts, and mobile phone maintenance to develop beneficiaries' skills and increase employment opportunities.
- Distributing conditional cash grants for work to support small projects and improve the income of beneficiary families.
- Providing the necessary support to restore infrastructure and contribute to improving the quality of services of the targeted communities.

Community Capacity Building Project on Integrated and Community-Based Humanitarian Activities

Funded by

UK Aid Fund for Development Organisation (**FCDO**).

Implementing partner

Tamdeen Youth Foundation and **Oxfam**

Targeted areas

Al Sabra and Dhi Al Sefal districts of Ibb governorate

Implementation period

31 November 2023 - 31 December 2026.

Project Objective

Rehabilitate prioritised community assets in Sabra and Dhi Al Safal districts in Ibb governorate to improve infrastructure and enhance the livelihoods of the targeted communities.

Project services and achievements during 2024

- Construction of a rainwater harvesting tank in Habail Al-Sabt village, Al-Sabra district with a capacity of 81 cubic metres.
- Stone paving of Al-Lu'aj - Zubaid in Al-Sabra district with an area of 410 square metres.
- Construction of Al-Mawdan water barrier in Izzlat Al-Seif, Dhi Al-Safal district with a capacity of 800 cubic metres.
- 550 metres of stone paving for the Naqil al-Maafda al-Aliya road in Al-Abruh isolation in Al-Sabra district

Project findings

- Improving infrastructure: Facilitate mobility and access to services.
- Providing sustainable water sources: Supporting agricultural communities.
- Enhanced livelihoods: Providing temporary employment opportunities for 391 youth from the local community.

Building the capacity of local communities and institutions affected by conflict and economic crises

Funded by

German Federal Ministry for Economic Cooperation and Development (BMZ)

Implementing partner

Tamdeen Youth Foundation and
Oxfam

Implementation period

1 September 2023 - 31 August 2024

Targeted areas

- Al-Ta'iziya District - Taiz Governorate
- Dhi Al Sefal District - Ibb Governorate

Project findings

- Improved sanitation:

Provision of safe sanitation services to 150 people in 4 villages in Taiz and Ibb governorates.

- Livelihood Support:

Establishing small businesses for:
130 families in Al Taiziya district - Taiz governorate.
35 families in Dhi al-Safal district - Ibb governorate.

- Youth training:

Qualifying 30 young men and women to work in the installation, operation and maintenance of solar energy systems.

Humanitarian Assistance and Resilience Project for Displaced Persons and Host Communities

Funded by

Danish International Development Agency (**DANIDA**)

Implementing partner

Tamdeen Youth Foundation (**TYF**)

Scope of implementation of the project

Al-Maafer and Al-Mawasit districts - Taiz

Duration of the project

January-December 2024

Total beneficiaries

32 families

Project activities in the food security sector

- Distribution of agricultural reserves to 16 agricultural associations in Al Maafer district
- Distribution of agricultural reserves to 16 agricultural associations in Al-Mawasit district

Project activities in the protection sector

- Establishment and training of 4 community protection committees in Al Maafer and Al Mawasit districts
- Providing cash incentives to the members of the protection committees for 16 members within 3 months in the two targeted directorates

Green Paths' project to enhance the environment and urban landscape in Taiz city

Funded by

Search for Common Ground (**SFCG**)

Implementing partner

Tamdeen Youth Foundation (**TYF**) in partnership with the Cleanliness and Improvement Fund in Taiz Governorate

Project period

November - December 2024

Targeted areas

Taiz Governorate

Project Objectives

Enhance the green environment and urban landscape in Taiz city, and support the culture of peace and beauty in the community.

Project activities

- **Afforestation of the central islands:**
Planting 163 Damas trees in the central islands extending from opposite Al-Shibani factories to the traffic round in Taiz city, while providing the necessary care for the trees.
- **Afforestation of the entrance to Taiz University:**
Planting 180 Damas trees at the entrance from the triangle to the university gate in Habil Salman, providing organic fertilisation and regular irrigation for two months to ensure their growth.

Community Capacity Building Project in Peacebuilding and Conflict Resolution

Funded by

German Federal Ministry for Economic Cooperation and Development (**BMZ**).

Implementing partner

Tamdeen Youth Foundation, in partnership with **Care**.

Implementation location

Shamaytin District - Taiz Governorate

Project activities

- Community dialogue sessions for local development
- Capacity building of young men and women in peacebuilding and conflict resolution
- Establishing a youth network and a women's network to promote a culture of dialogue and negotiations for development

Leading the Localization Initiative and Improving Response Mechanisms in Yemen

Funded by

DRC
Save the Children

Implementing partner

Tamdeen Youth Foundation (TYF)

During 2024, Tamdeen Youth Foundation continued to lead the Civil Society Organizations Localization and Response Improvement Initiative in Yemen. The initiative aims to strengthen localization efforts, enhance the response system in Yemen, and empower local organizations to lead the response to the needs of their communities.

2024 Achievements:

- Held a national online conference to review the localization performance measurement methodology. The event brought together over 40 representatives from 30 organizations across Yemen, including Hadramout, Marib, Aden, Taiz, Sana'a, and Hodeidah.
- Organized a workshop to review the "Localization and Humanitarian and Development Response Improvement Strategy in Yemen."
- Provided training on humanitarian advocacy and campaign planning to strengthen local capacities.
- Published a special study on corporate social responsibility practices in Yemen: **assessing the private sector's role in humanitarian and development response.**
- Established a digital platform to amplify the voices of local actors and develop innovative tools to raise awareness and stimulate dialogue on localizing humanitarian action in Yemen.

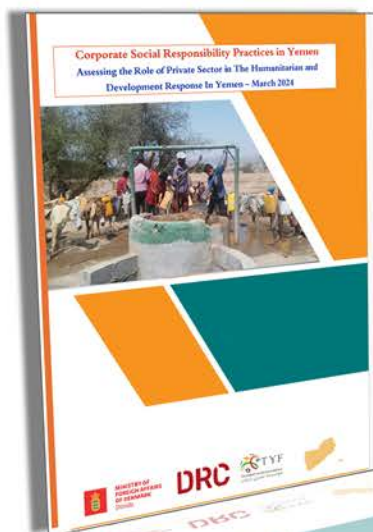

Studies

Corporate Social Responsibility: A recent study assesses private sector engagement in humanitarian and development response in Yemen

As part of the strategy to localise and improve response mechanisms in Yemen, funded by the Danish International Development Agency (DANIDA) and sponsored by the Danish Refugee Council (**DRC**) and the Tamdeen Youth Foundation (**TYF**), the study 'Assessing the Reality of Corporate Social Responsibility in Yemen: Private Sector Engagement in Yemen's Humanitarian and Development Response'.

The study provides a comprehensive analysis of private sector CSR initiatives and practices in Yemen, identifying internal and external challenges and opportunities.

The study is the first of its kind in Yemen and represents a valuable addition to efforts to achieve a more sustainable and locally-led response, providing practical recommendations for activating corporate social responsibility and enhancing the role of the private sector in responding to the humanitarian and development challenges facing Yemen.
